

PTSG to deliver specialist services for redeveloped Thames View House

2 years ago

Premier Technical Services Group Ltd (PTSG) will deliver specialist electrical services at Thames View House, a tower block in Thames Mead Estate which is being redeveloped.

The £20m+ development will replace the outdated Thames View House with a new contemporary building, delivering 45 homes available for social rent and 52 for shared ownership – making the scheme wholly affordable.

The new development provides an opportunity to improve the area surrounding the building, making a safer environment for the community and a better setting for the neighbouring recreation ground, which connects the site to the River Thames tow path.

The current building comprises 64 homes in a nine-storey residential block. Thames View House was built in 1972 and has come to the end of its useful life after years of investment and adaptation.

Engineers from [PTSG Electrical Services Ltd](#) will deliver a lightning protection system to protect the newly redeveloped residential building and all users during electrical storms.

PTSG is the UK's leading provider of lightning protection services. This includes bespoke and standard system installation, test and inspection and maintenance. It also encompasses surge protection and specialist earthing systems.
