

PTSG to safeguard Clerkenwell development

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist electrical services at a series of Clerkenwell warehouses that are undergoing a retrofit.

143-157 Farringdon Road is undergoing a retrofit which revives and extends a series of Clerkenwell warehouses for client BentallGreenOak, securing their future as workspace by reducing their carbon footprint, creating a coherent identity and enhancing tenant experience.

The handsome Victorian buildings occupy a prominent stretch of Farringdon Road, a short walk from Farringdon Crossrail station, within the Clerkenwell Green Conservation Area.

Shopfronts are upgraded creating opportunities for complementary uses including coworking, retail or cafes. A reconfigured basement supports sustainable travel with cycle storage, lockers and showers for building occupants.

Engineers from [PTSG Electrical Services Ltd](#) will deliver a lightning protection system to protect the retrofitted buildings in Clerkenwell and all users during electrical storms.

PTSG is the UK's leading provider of lightning protection services. Its engineers are at work throughout the nation, delivering test and inspection, repairs, upgrades and brand-new bespoke or off-the-shelf lightning and surge protection systems. PTSG serves clients in all industry sectors.
