

PTSG works with RNLI

2 years ago

Premier Technical Services Group Ltd (PTSG), via constituent company Total Environmental Compliance (TEC), is working on a water hygiene contract for the Royal National Lifeboat Institution (RNLI).

The Royal National Lifeboat Institution is the largest charity that saves lives at sea around the coasts of the United Kingdom, the Republic of Ireland, the Channel Islands, and the Isle of Man, as well as on some inland waterways.

Considerable effort is put into training and education by the institution, particularly for young people; in 2013, more than 6,000 children a week were spoken to by education volunteers about sea and beach safety, and over 800 children a week received training. Crews rescued on average 22 people a day in 2015. The institution has saved some 140,000 lives since its foundation, at a cost of more than 600 lives lost in service.

Through its comprehensive provision of water hygiene, water treatment and remedial services, PTSG is a trusted partner for clients in all industry sectors. Its services ensure the safe management of water systems, with protection from Legionella and compliance with the necessary regulations. Its focus is on reliability and sustainability and saving companies time and money.
