

## Win for Artic in Air Handling Unit Maintenance contract

2 years ago

After a competitive tender process, Artic is proud to announce its latest win with a Major UK film Studio for the maintenance of their Air Handling Units across the entire estate.

Artic will provide a safe and comfortable [indoor environment](#), minimising risks to building occupants whilst promoting the studio's brand values at all times.

In addition, it will ensure the reliable operation of all critical systems providing planned preventative and reactive [maintenance](#) processes for all assets and systems in compliance with SFG20. Furthermore, it will continuously be assessing the asset performance to identify opportunities for increasing energy efficiency.

An Artic engineer will visit the sites on a quarterly basis and will deliver the PPM service to a pre-agreed master schedule on all in scope AHU assets.

To manage all facets of the service requirement, Artic will appoint a dedicated Contract Manager and Contract Administrator [team](#). This team will be responsible for actioning, guiding, monitoring, and managing the service requirement. They will utilise our [CAFM](#) platform to offer quick and seamless job allocations, worksheets, and reports, along with extensive data export capabilities that report contract performance against a mutually agreed Key Performance Indicator Framework.

A spokesperson said: "At Artic, we specialise in providing professional facilities management solutions to commercial offices. Our goal is to enhance productivity and improve employee satisfaction through a range of services that are tailored to meet the unique needs of each business. Our services include maintenance, energy management, compliance and more. Discover how we can help improve your office facilities by [contacting us](#) today."
