

# Construction Product Testing Regime – Independent Review

2 years ago

The Independent Review of the Construction Product Testing Regime led by Paul Morrell OBE and Anneliese Day KC has been published.

The purpose of the Review was to:

- to identify any potential weaknesses in the system and
- to make recommendations for improvement.

It undertook a critical assessment of the system for testing and certifying construction products and how the system could be strengthened to provide confidence that construction products are safe and perform as labelled and marked.

See the [terms of reference for the Independent Review](#).
