

PTSG delivers fire solution for property development group

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has delivered a dry risers project for a major London-based property investment and development group on Euston Road, London.

Engineers from [PTSG Fire Solutions Ltd](#) delivered a minor/visual inspection of the dry risers installed at the building. This kind of inspection is required every six months to ensure that there is no obvious signs of damage or vandalism. This would be followed either by a further minor inspection in six months or an annual pressure test in 12 months. The work of PTSG's engineers brought praise from the client for the speed of their visit and the quick turnaround in sending the report of their inspection.

Central London's commercial property market recorded the busiest half-year on record in the first half of 2022, with total investments of £10.3bn. The client for which PTSG delivered fire solutions at Euston Road owns and manages 1,000,000 square feet of prime office, retail, hotel and leisure space in London and the USA.
