

PTSG to provide defence strategy at QPR's new training facility

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist Access & Safety services at the new training facility for Queen Park Rangers Football Club.

Queens Park Rangers Football Club, commonly abbreviated to QPR, is a professional football club based in Shepherd's Bush. The team competes in the EFL Championship, the second tier of the English football league system.

A purpose-built training ground facility is currently under construction, with completion expected in the summer of this year. The new training ground will be utilised by the first team, U21s as well as the academy teams through the club.

The building is being constructed with a hybrid modern Steel Frame and exposed timber, with concrete decks to both first floor and mezzanine floor levels. The external façades will feature both aluminium and polycarbonate cladding on the relevant elevations with feature sustainable home-grown timber fins on the vertical facades.

Engineers from [PTSG Access & Safety Ltd](#) will be delivering ManSafe systems to the standing seam and fabricated access units at the new facility. As with all fall arrest installations provided by PTSG Access & Safety Ltd, they are guaranteed to provide complete safety for operatives accessing the building's façade in order to carry out maintenance work.
