

Atalian Servest, part of the OCS Group, awarded a 3-year contract with the Wellcome Genome Campus

2 years ago

Atalian Servest, part of the OCS Group, have been awarded a three-year contract at the prestigious Wellcome Genome Campus.

Atalian Servest will deliver cleaning, washrooms and waste segregation services at the scientific research campus based in Hinxton, Cambridgeshire. The contract manager will oversee the daily running of the contract with support from the senior operations team.

The Wellcome Genome Campus is home to some of the world's foremost institutes and organisations in genomics and computational biology, committed to delivering life-changing science with the reach, scale, and imagination to solve some of humanity's greatest challenges.

Jen Bates, Sector Managing Director, Atalian Servest, said: "We are delighted to be working in partnership with the Wellcome Genome Campus. Our local knowledge and expertise in delivering services to similar clinical environments means we have a sound understanding of the client's requirements, and look forward to supporting them at their Hinxton site."

Jen Waterfield, Senior Procurement Partner at Wellcome Sanger Institute, added: "We were looking for a Facilities Management company who could provide a bespoke service at our multiple-building site. From the outset Atalian Servest have worked collaboratively with our team to deliver a best value solution with a strong sustainability focus."
