

New Cambridge facility treated to PTSG's expertise

2 years ago

[Premier Technical Services Group Ltd](#) has been contracted to deliver specialist electrical services at a progressive new waste water treatment plant in Cambridge.

Anglian Water is relocating its Cambridge Waste Water Treatment Plant to enable the regeneration of north east Cambridge. The relocation will make way for more than 5,600 new homes, one million square feet of commercial space and thousands of new jobs.

Anglian Water's vision promises to go beyond just building a new plant. It isn't simply about moving an old facility to a new location. The new facility, as well as being operationally net zero carbon, will be energy neutral. It is designed to adapt to changing social and environmental priorities, increasing resilience to storm flows and flooding and provide a long-term solution to how we best treat waste water for a growing Greater Cambridge population.

Engineers from [PTSG Electrical Services Ltd](#) will deliver a brand-new lighting protection system at the new waste water treatment facility in Cambridge. This will provide vital protection for the structure and users in the event of an electrical storm.

PTSG is the UK's leading provider of lightning protection services. It delivers brand-new systems, testing and inspection, repair and upgrade services to lightning and surge protection systems for clients in all industry sectors.
