

PTSG to work at West London development

2 years ago

[Premier Technical Services Group Ltd](#) has been contracted to deliver specialist electrical services at a new residential development in West London.

The Lampton Parkside residential development is located on the site of the former Civic Centre. Phase 1 has delivered 160 new homes, all of which are affordable housing, as well as a new, eco-friendly, carbon neutral Civic Centre on an under-used town centre car park. Phase 2 has seen demolition of the old civic centre, an over-sized and environmentally inefficient building. Construction of 780 more homes is now under way.

Engineers from [PTSG Electrical Services Ltd](#) will deliver a brand-new lightning protection system at the Lampton Parkside residential development, safeguarding structures and residents in the event of an electrical storm.

PTSG is the UK's leading provider of lightning protection services. Its engineers are at work throughout the nation, delivering test and inspection, repairs, upgrades and brand-new bespoke or off-the-shelf lightning and surge protection systems. PTSG serves clients in all industry sectors.
