

Savills expands engineering consultancy in Glasgow

2 years ago

Savills continues to expand its Engineering & Design Consultancy (EDC) team with the appointment of Martin McClafferty as associate director and William Johnston as associate in Glasgow.

Martin is an experienced Chartered Engineer with 25 years' experience operating in the construction industry across various sectors. He joins from HDR Consulting Engineers. At Savills Martin will focus on consultancy projects, electrical engineering, low energy and sustainability solutions, along with technical due diligence, dilapidation, condition & acquisition surveys.

William joins Savills as a Chartered Engineer specialising in HVAC (heating ventilation and air conditioning design) responsible for delivery of mechanical services design. He was previously lead Mechanical Engineer at Kane Group and has 25 years' experience in the sector working with leading global consultancies including Arup, Aecom and Ramboll on projects over multiple sectors across the UK and overseas.

Nadeem Khan, EDC director at Savills, comments: "How buildings are designed and operate is under the lens now more than ever as the property industry adapts to Net Zero targets in the UK. We are delighted to welcome Martin and William to the team whose collective expertise complements our existing offer to clients as we continue to expand."

Martin adds: "I am delighted to join Savills as part of the Engineering and Design Consultancy team. Based in Glasgow I look forward to collaborating with our colleagues and clients as we deliver projects across Scotland and the UK."

William says: "I am excited to integrate our engineering consultancy service with work that Savills does

across the existing business lines and delivering projects exceeding the expectation of our clients.”
