

PTSG continues work for Kier

2 years ago

Premier Technical Services Group Ltd (PTSG) is continuing its long-standing working relationship with Kier, through its provision of specialist water treatment services.

Kier Group plc is a British construction, services and property group active in building and civil engineering, support services, and the Private Finance Initiative. Founded in 1928 in Stoke-on-Trent it initially specialised in concrete engineering before expanding into general contracting and house-building.

PTSG Water Treatment Ltd currently delivers specialist water treatment services for Kier, and has recently received praise from the Kier team for the smooth running of the contract as a result of its positive attitude and extensive knowledge of Kier's sites.

In 2020, PTSG worked with Kier delivering the following:

- Portable appliance testing (PAT) at seven different sites
- Emergency lighting, lightning protection, dry riser installation and fall arrest testing

PTSG delivers a growing number of bundled services contracts with major first-tier contractors, with others including Sodexo plc, Interserve, Arcus FM, JLL and Vinci Facilities. This illustrates the Group's multi-disciplinary capabilities and the benefits this offers to partners such as a single point of contact for all services and the ability to ensure compliance across all areas.
