

PTSG to shore up Leicester leisure centre

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) is to deliver specialist Access & Safety services at Aylestone Leisure Centre in Leicester.

The Centre offers a variety of activities based in the facility's sports hall, 3G football pitch, swimming pools and gym. The main sports hall comprises six badminton courts and seating for 600 people. There is a 25-metre main swimming pool and an 18-metre teaching pool. Aylestone Leisure Centre is one of seven centres offered by Active Leicester.

In this project engineers from [PTSG Access & Safety Ltd](#) will install a Mansafe system to the felt roof of the leisure centre. Such systems are vital for preventing the fall of maintenance operatives who carry out work at height.

[PTSG Access & Safety Ltd](#) is one of the Group's five independent divisions, the others being PTSG Electrical Services Ltd, PTSG Building Access Specialists Ltd, PTSG Fire Solutions Ltd and PTSG Water Treatment Ltd. One of PTSG's great strengths is its capability of combining services from the different divisions; this often delivers a complete specialist services solution for customers, saving them the time and expense of hiring multiple service providers.
