

Digital transformation specialist announces latest round of hires

2 years ago

[Peacock Engineering](#), a class-leading specialist in managed cloud enterprise asset management (EAM), field service management (FSM) and Facility Management solutions, has announced the appointments of two highly skilled additions to its technical team.

The latest round of hires also includes further growth in its sales division, as Lee Turnbull joins as Business Development Manager.

The announcement comes as Peacock Engineering continues a period of impressive growth which has seen its team grow 20% in the last year. Over the last few months, the firm has won a series of new high-profile customers and also opened a second technical facility in Pune, India.

Expanding on its technical capabilities and to support the recent expansion, Tom Johnson joins the firm as a Solution Architect. Tom brings with him ten years of practical experience with IBM Maximo, both as a lead consultant and Solution architect. Tom has worked in a variety of industries ranging from Oil and Gas, to the Automotive industry.

Joining Tom is Principal Consultant, David Shaw. David also has over a decade of experience in the digital solutions space, is a highly skilled IBM Maximo developer and has expertise in the plant and engineering industry sector.

Tom Johnson said: "I'm delighted to join Peacock Engineering. The company is renowned in the industry for both its technical IT capabilities and engineering knowledge. I am looking forward to adding my expertise to its diverse mix, helping to expand the teams' technical capabilities further and support our clients with best in industry digital EAM and FSM innovations and solutions."

Lee Turnbull has also joined Peacock Engineering as Business Development Manager. Lee has nearly ten years' experience working in the EAM sector, specialising in helping organisations develop effective strategies for improving operational day-to-day efficiencies, achieve health & safety compliance and optimise scheduling processes. Lee has experience across a broad range of sectors, including energy and utilities, life sciences, manufacturing, oil and gas, and transport.

A Gold Partner of both IBM and IFS business solutions, Peacock Engineering provides digital enterprise asset management and field service management solutions to some of the UK's leading utility, manufacturing, oil and gas, and logistics organisations. Customers include the energy giant SSE, LPG supplier Flogas, and global leader in logistics, DHL.

Matt Deadman, COO of Peacock Engineering, said: "With our client base rapidly expanding and the demand for EAM and FSM solutions growing, I'm thrilled to welcome David, Tom and Lee to the team at an exciting time for Peacock Engineering."

"Increasing both our functional and technical capabilities to keep up with the growing EAM and FSM demands our clients are faced with is a priority for us. Our new appointments will allow the business to continue to evolve and provide the best possible service and solutions that help our customers save time, reduce costs and improve data reporting accuracy and compliance."
