

PTSG completes roofing project for waste management specialist

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#), via constituent company NSS Group, has completed a specialist roof repair project for a company specialising in providing clean water and wastewater services.

Specialists from [PTSG Building Access Specialists Ltd](#) installed a new rooftop skylight to replace a leaking and badly discoloured unit at the business premises. There were several challenges along the way: there were QHSE considerations regarding the roof having low parapet walls; electric solar panels were also installed close to the part of the roof where the work was required. However, the job was completed entirely satisfactorily.

PTSG Building Access Specialists Ltd delivers a comprehensive range of services for planned and reactive building maintenance projects throughout the UK, for some of the nation's best-known organisations. The types of work undertaken daily are:

- Roof Maintenance including repairs, replacements and cleaning
- Roof Surveys
- Gutter Maintenance
- Siphonic Drainage Systems
- Glazing Repair / replacement
- Glazing Surveys
- Lighting Repair / Maintenance
- Man-Safe Testing / Installation
- Window Cleaning
- Cladding Cleaning

- Graffiti Removal
