

PTSG to safeguard Manchester's Middlewood Locks

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist fire solutions at a new-build residential development in Manchester.

Located in an area of greater Manchester that is undergoing a major redevelopment, Middlewood Locks offers a collection of canal-side townhouses and apartments centred around a private residents' garden. The area also boasts a range of shops, hotels, restaurants and bars and public open spaces.

In this project, engineers from [PTSG Fire Solutions Ltd](#) will deliver sprinkler systems and dry risers. In the event of a fire breaking out, these systems will ensure that residents have the best chance of avoiding harm and damage to the building is kept to a minimum.

In 2019, PTSG was contracted to install earthing and lightning protection at Middlewood Locks when it was still under construction. With five independent business divisions offering a comprehensive range of specialist services, PTSG can deliver a full-service solution for its 20,000 customers.
