

PTSG to service sites for real estate giant JLL

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) is delivering specialist Access & Safety services at sites for global commercial real estate services company JLL.

Jones Lang LaSalle Incorporated (JLL) was formed in the UK in the late 1990s and now has offices in 80 countries worldwide, employing over 100,000 people. Services include investment management, asset management, sales and leasing, property management, project management, development, and property technology.

JLL manages the London offices of the social media company Facebook. In late 2021 and early 2022, JLL made two “proptech” acquisitions. In November 2021, it purchased the property management software company Building Engines, and in February 2022 it acquired Hank, a company developing AI-based technology to improve energy efficiency of buildings.

In this three-year contract, engineers from [PTSG Access & Safety Ltd](#) will carry out testing of fall arrest systems at numerous sites for JLL. Fall arrest systems are put in place so that if a person should fall, they won't hit the surface below and risk serious injury. Regular testing and maintenance are required by law to ensure they remain operationally robust and able to protect people at all times.
