

PTSG delivers special services for major online retailer

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver Building Access Specialist services for a major online grocery retailer.

While the client specialises in the delivery of groceries ordered online, it has opened a number of physical stores in both the UK and the US. This is where operatives from [PTSG Building Access Specialists Ltd](#) will carry out planned preventative maintenance (PPM) works in this new contract.

PPM is an importance service offered by PTSG to ensure buildings remain fully operational, heading off breakdowns before they have chance to occur. This also ensures buildings remain as safe as possible.

PTSG's directly-employed teams are highly experienced and accredited in the recognised techniques for accessing buildings both at height and at ground level.

A variety of techniques and access equipment are employed, each offering their own advantages. Abseil or rope access is arguably the most cost effective and safest of all techniques. PTSG's operatives are all IRATA-trained rope access. With minimal time spent setting up, they can move laterally as well as up and down quickly and easily to reach all areas of a building's façade.
