

PTSG to protect new Wickside development

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has secured a contract to provide specialist electrical services at a new neighbourhood in East London.

Wickside is a brand new seven-acre canal-side neighbourhood in Hackney Wick, East London, which will see the creation of around 500 homes, along with a variety of shops, eateries and leisure facilities. Reflecting the area's status as an artistic hub, the site will also be home to creative studios, an art gallery, and, as a nod to Hackney Wick's industrial past, a large brewery.

Set to comprise a mixture of apartments, penthouses and terraced houses, all of the properties at Wickside will boast beautifully modern interiors with industrial-chic style at the core of the design. Each floor plan will feature a designer kitchen, luxuriously appointed bathrooms and shower rooms with Terrazzo tiling, and a private balcony or terrace.

In this new contract, engineers from [PTSG Electrical Services Ltd](#) will deliver a new lightning protection system to protect residences and users in the event of an electrical storm.

PTSG is the UK's leading provider of lightning and surge protection systems for customers in all industry sectors. It's engineers design and install systems to suit every kind of building, as well as providing off-the-shelf systems. They also provide periodic test and inspection and remedial services to keep systems working efficiently all year round.
