

Facilities Management Software Company Azolla Secures Major Client for Innovative IoT-Integrated Solution

2 years ago

Dublin, Ireland – [Azolla](#), the pioneering Irish software company renowned for its innovative Facilities Management software, has announced a significant milestone by welcoming a high-profile client to its rapidly expanding portfolio. This new partnership solidifies Azolla's position as an industry leader, empowering companies to streamline their operations and enhance productivity in the Facilities Management sector.

Azolla's cutting-edge software seamlessly combines Computer-Aided Facilities Management (CAFM), Internet of Things (IoT) integration, and Asset Management features to deliver an all-encompassing solution for facilities managers. Developed by professionals with over two decades of experience in the field, Azolla's software is designed to tackle the complex challenges of modern facilities management.

The software uniquely enables organizations to plan, execute, and monitor their day-to-day operations in real-time, thus revolutionising the way facilities are managed. It integrates planned maintenance schedules with IoT sensor technology, allowing real-time monitoring of multiple locations around the clock, and immediate alerts to key personnel when issues arise.

At the heart of Azolla's offering is its scheduling module, which provides an efficient means to plan site visits, validate insurance details, organise permit-to-work processes, and attach service reports. Moreover, it automates the allocation of reactive work to designated staff or contractors, based on the type of issue or its location. By seamlessly integrating sensor technology and data from Building Management Systems (BMS), Azolla unifies and centralises all critical facility management tasks.

The Azolla mobile app takes this functionality a step further, enabling on-the-go access for staff. It allows for real-time work updates, recommendations, and electronic paperwork submissions. Additionally, when working with external contractors, Azolla can facilitate seamless communication via email, ensuring that all work-related exchanges are efficiently tracked and stored.

Azolla's innovative software has made a significant impact across various sectors, with key industries such as Facilities Management, Property Management, Service Delivery, Manufacturing, Retail, Healthcare and Educational institutes embracing its capabilities. Its robust, user-friendly platform has empowered businesses to manage facilities more efficiently, reduce downtime, and enhance overall productivity.

The company's latest achievement in securing a high-profile client underscores Azolla's commitment to providing innovative solutions in the Facilities Management sector. With its IoT-integrated platform and real-time capabilities, Azolla is proving to be the industry's go-to choice for businesses aiming to optimise their operations and ensure seamless facility management.

As Azolla continues to gain recognition in the industry, its growth trajectory is firmly set. The announcement of this significant new partnership only reaffirms Azolla's status as a trailblazer in Facilities Management software, and serves as a testament to the growing demand for streamlined, integrated, and data-driven solutions in the modern world of facility management.
