

Concerto announces significant growth

3 years ago

Concerto, a trusted provider of CAFM & Integrated Workplace Management Systems, announces a period of record, double-digit growth, including the acquisition of key accounts in emerging vertical markets. Part of the wider, Bellrock Group, Concerto believes that the surge is attributed to a shift in the market desire for truly integrated software solutions; with many companies still operating with offline, disconnected, and disparate information sources. New accounts include University of Manchester, Cambridgeshire County Council, St Helens and Knowsley NHS FT and Pilgrims Friend Society.

“Our recent success marks a pivotal moment for us,” states James Heysmond, Business Development Director of Concerto. “Entering new markets validates our strategy and highlights the unwavering commitment from our owners and board to make Concerto IWMS the best solution on the planet for both the built and non-built environments.”

The growth further establishes Concerto IWMS as an industry challenger, poised to meet the evolving demands of property and facility management sectors.
