

Life safety accreditation awarded to Norse Group

3 years ago

Accreditation for BAFE SP205 Life Safety Risk Assessment has been awarded to Infinity, part of the [Norse Group](#).

The company reported it is able to offer suitable and sufficient fire risk assessments in line with the Regulatory Reform Fire Safety Order 2005.

The [BAFE](#) SP205 Life Safety Fire Risk Assessment was established in mid-2012 for companies acting as life safety fire risk assessment providers for other businesses. The scheme was created to provide assurance to companies commissioning the fire risk assessments and confidence regarding the relevance and quality of services.

The benefit of using a third-party accredited organisation is that clients can feel confident that fire risk assessors are competent specialists who will produce a detailed report of facilities, ensuring the person responsible for the premises is compliant with their legal obligations.

Fire risk assessor Owen Jones said:

“Achieving BAFE accreditation is an important milestone for our organisation, it provides our clients and stakeholders with assurances that our services are 3rd party accredited with regular external auditing completed by [National Security Inspectorate](#) (NSI), ensuring we maintain the highest of standards in the fire safety sector.”

He is an associate member of the [Institute of Fire Safety Managers](#) (IFSM), BAFE Membership Registration Number 4638, with six years of experience in the fire safety sector. He has completed level 4 diploma

training with the Fire Protection Association (FPA), Fire Safety Management in Residential Premises, and BB100 Design for Fire Safety in Schools. In addition, Mr Jones is also a competent BRE fire door inspector and passive fire compartmentation surveyor.
