

Aaron FM delivers roofing project at high street building society's Wilmslow branch

2 years ago

[Aaron FM](#), a leading facilities management company, has recently completed a roofing project at a leading local high street building society branch in Wilmslow, addressing critical safety concerns and ensuring the well-being of both the public and staff.

The project was initiated due to issues with the roof, particularly a loose apex on the parapet wall, which posed a significant risk.

To mitigate the risk and prevent further damage, Aaron FM swiftly erected scaffolding within a couple of days. The team then boarded out the roof area, securing it against potential hazards. As part of the comprehensive solution, both apexes of the parapet walls were carefully dismantled and rebuilt using new bricks to seamlessly match the existing structure.

The coping stones were cleaned and re-utilised to maintain the aesthetic integrity of the building.

The entire project was completed ahead of schedule, showcasing Aaron FM's commitment to efficiency and client satisfaction. The success of the project earned praise from both the client, Mitie, and the on-site staff, who expressed their satisfaction with the timely and effective resolution of the roofing issues.

John Scowen, Aaron FM Account Director, commented on the achievement, saying:

"Our team at Aaron FM takes great pride in delivering solutions that not only meet but exceed our clients' expectations. This building society project in Wilmslow presented a unique challenge with immediate safety implications. We acted swiftly, deploying our expertise to erect scaffolding, secure the roof, and rebuild the compromised structures. Completing the project ahead of schedule is a testament to our

team's dedication and efficiency. We are pleased to have satisfied both Mitie and the on-site staff, ensuring a safe and stable environment for everyone involved."

Aaron FM continues to solidify its reputation as a reliable and responsive facilities management partner, addressing challenges with professionalism and delivering results that prioritise safety and satisfaction.

The company is part of the wider Aaron Engineering Group, a multi-disciplined group of companies providing expert services, solutions, and resources to the Property, Rail, and HV Electrical Sectors in the UK. The group's comprehensive approach ensures the seamless integration of services, fostering a reputation for reliability and professionalism.
