

Jaguar successful in tender for M and E maintenance at The Blue Fin Building

2 years ago

[Jaguar](#) are delighted to announce that we have been successful in our recent retender for the M&E maintenance at The Blue Fin Building, located on Southwark Street.

This landmark site covers approximately 500,000 ft² and is just a short walk from the Millennium Bridge. The Blue Fin Building gets its name from the unique 2,000 blue aluminium fins that cover its façade and also features an open terrace with uninterrupted views of London on the 10th floor.

Danny Howell, Account Manager, commented:

“We look forward to continuing our relationship with Savills for a further 3 years. Our dedicated team is committed to upholding the highest standards, and we are proud to contribute to the ongoing success of this iconic landmark in the heart of London.”
