

## Precision Facilities Management wins contract at Westminster Chapel

2 years ago

[Precision FM](#) has been awarded a hard FM contract with [Westminster Chapel](#), a Grade II Listed church and event space located in central London.

As well as its own thriving worshipping community, the Chapel is well known as a host venue for many Christian conferences and assemblies. Constructed in 1864, the multi-purpose space features Grade II Listed Victorian architecture married with contemporary design which includes one of Europe's largest sustainable cork floors.

Precision FM will be providing the Chapel [with a range of hard FM services](#) including reactive and preventative maintenance as well as supporting on capital refurbishment projects. Commenting on the contract win, Raymond Wong, Executive Pastor said: ""We (Westminster Chapel) came to the realisation that we were devoting too many resources to managing our premises, which was taking away resources from our core charitable work.

"We are a Grade-II Listed building and have many different users of our space so an off-the-shelf solution wouldn't work for us. We found in Precision FM a responsive team that demonstrated an understanding of our unique site and a willingness to work with us to ensure we could focus on what mattered most."

Brij Thankey, CEO at Precision FM said: "We're really pleased to have secured the contract to provide FM services to Westminster Chapel. Caring for a listed building requires skill and dedication and through the provision of effective facilities management, we're looking forward to ensuring that the Chapel can continue to play a key role as a community hub for years to come."
