

Aaron Access engineers praised for outstanding security gate installation at University of Huddersfield

2 years ago

In a testament to their expertise and professionalism, [Aaron Access](#) engineers Harry Kendal and Chris Harrison have received accolades for their exceptional installation of a security gate at the University of Huddersfield.

The project, commissioned by the University's Directorate of Estates and Facilities, presented unique challenges due to the location of the installation in an under-croft area.

Despite these challenges, Harry and Chris executed the installation flawlessly, earning praise from the client, Andy Bamforth, Health, Safety, and Compliance Manager at the University of Huddersfield.

The University's decision to engage Aaron Access followed a thorough procurement exercise for a replacement sliding gate. The gate's strategic location in the under-croft area posed challenges that required a skilled and efficient removal and installation team.

Aaron Access not only met but exceeded expectations by completing the work safely within the allocated timescales, allowing for the seamless continuation of the University's business operations.

Andy Bamforth, Health, Safety and Compliance Manager at the University of Huddersfield praised Aaron Access's outstanding service, commending the site team, stating:

"Harry and Chris were polite and courteous to all University staff. They always accommodated our requirements regarding access, maintained their work area to a high standard with good housekeeping

practices, and provided a comprehensive summary to Estates and Facilities staff, demonstrating how the gate operated, including manual opening. Before leaving the site and upon completion of the work, they left the work area neat and tidy.”

He also underlined the professionalism of Kendal and Harrison, stating, “We wouldn’t hesitate in inviting them back to the University to undertake other works. Harry and Chris are a credit to Aaron Access.”

The commendation reflects not only the technical competence of Harry Kendal and Chris Harrison but also their commitment to excellent customer service. It underscores Aaron Access’s dedication to delivering top-notch security solutions while prioritising client satisfaction.

Aaron Access continues to set industry standards in automatic gates, access control, CCTV, turnstiles, bollards, barriers and all types of controlled access across the UK. The successful installation at the University of Huddersfield serves as a testament to the company’s commitment to excellence and client-focused approach.

The company is part of the wider Aaron Engineering Group, a multi-disciplined group of companies providing expert services, solutions, and resources to the Property, Rail, and HV Electrical Sectors in the UK. The group’s comprehensive approach ensures the seamless integration of services, fostering a reputation for reliability and professionalism.
