

Bouygues Energies & Services rebrands as Equans in the UK

2 years ago

[Equans](#) has announced that the activities of its Bouygues Energies & Services (E&S) subsidiary in the UK will adopt the Equans brand.

All Bouygues E&S branded facilities management, energy solutions and connected cities operations in the UK, will become Equans from January 2024.

Management and teams of both businesses brought together their complementary expertise to form a single business serving customers across the UK & Ireland in January 2023, but until now have continued to operate under separate brands.

The move to a single brand completes an integration programme which began in October 2022 when Bouygues Group acquired the global Equans business.

The rebrand further strengthens Equans' brand presence across the UK& Ireland, which now comprises 15,000 employees, with revenues of approximately £2.5 billion in sustainable facilities management, community regeneration and cutting-edge energy and digital services.

Jean-Philippe Loiseau, CEO of Equans UK & Ireland, said: *"This rebrand is a key moment in the evolution of our business which follows a smooth integration of our teams. Uniting together behind a single brand -Equans, means that across the UK & Ireland we have 15,000 employees committed to supporting our customers to create a low carbon, more resilient world."*
