Council

The Department for Levelling Up, Housing and Communities (DLUHC) has published updated guidance in relation to the Cladding Safety Scheme (CSS).

The [CSS](#) is for buildings that are 11m+ outside London and 11-18m inside London. The Scheme provides funding for the remediation or mitigation of the fire safety risks linked to unsafe external wall systems on residential or mixed-use buildings where the responsible developer cannot be identified.

It is a requirement of the CSS that applications be supported by a Fire Risk Appraisal of External Wall construction (FRAEW) undertaken by an approved fire risk assessor. If you do not already have a FRAEW, when you apply, you will be provided with a contact list.

More information can be found [here](#).
