

Fleet seating collection launched by KI Furniture

2 years ago

Designed to be alluring and timeless, the Fleet Lounge Seating Collection, created by visionary designer Bruce Kenneth and provided by [KI](#), is intended to elevate any space with a sense of elegance.

Inspired by mid-20th century modern furniture, the collection includes a unique fluidity and a distinct sense of nostalgia. Its seamless curves carefully juxtapose its unconventional edges to create a refined design that offers sophistication and will captivate any onlooker.

The Fleet Chair has been masterfully crafted to have a one-piece frame that blends seamlessly with its legs to enhance both its aesthetic appeal as well as its durability and stability. Frame options include Ash, Beech, or Walnut, and its plush cushions can be upholstered in a range of options but will still provide an unparalleled level of comfort and relaxation.

Customers can upgrade their comfort with the Fleet Ottoman, the perfect companion to the Fleet Chair, and providing the ideal spot to rest weary feet and add further to the sense of opulence. The ottoman's smooth, organic curves continue the collection's theme of harmonious designs and can be designed to either match or contrast with your chair with a selection of frame finishes and upholstery options. The ottoman is also versatile in that it can be used as additional seating, or as a standalone piece.

To complete the collection, or as a functional centrepiece, the Fleet Coffee Table complements the overall harmonious design of the collection while providing a stylish surface for your favourite books, beverages, or décor. The table is available in Ash, Beech, or Walnut according to your preference and the overall aesthetic you'd like to achieve.

“The unparalleled craftsmanship and mid-century modern design of the Fleet Collection is sure to be a standout centerpiece to any space it adorns; it’s more than just furniture, it’s an experience,” said the company.
