

PTSG stationed at iconic London development

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#), has been contracted to deliver specialist services at Battersea Power station, one of the most famous buildings of its kind in the country, which is undergoing a transformation.

The iconic Grade II* listed building and surrounding area are being brought back to life as one of the most exciting and innovative mixed-use neighbourhoods in the world – a place for locals, tourists and residents to enjoy a unique blend of restaurants, shops, parks and cultural spaces.

In this contract, engineers from [PTSG Electrical Services Ltd](#) will undertake a test and inspection of the lightning protection system. It's a system that PTSG first installed in 2018 – one of the biggest lightning protection schemes in the Group's history.

Engineers from PTSG Access & Safety Ltd have also previously installed ManSafe systems and an abseil track at the development, ensuring the safety of engineers working at height on this iconic structure.
