

## PTSG works at Hertfordshire retirement home

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist Access & Safety services at a substantial retirement home in Hertfordshire.

Castle Village, located in Berkhamsted on the edge of the Chiltern Hills, is described as an enchanting community, steeped in history. One of the most extensive retirement villages in the area, it is renowned for its vibrant and varied social life.

It is part of the Retirement Village network of retirement homes, designed to help people stay active for longer. There are currently 18 retirement homes in the network, from the Midlands and the North to the South-East and South-West as far as Cornwall.

In this contract, engineers from [PTSG Access & Safety Ltd](#) will install mansafe systems to the exterior of Castle Village. A mansafe system is a type of fall protection system designed to prevent falls from height. The term mansafe encompasses everything from eyebolts to roofline systems and is mainly used to describe anchor points, fall arrest systems and fall restraint systems that utilise harnesses.
