

Empowering change: Nanogreen's vision for sustainable facilities management

1 year ago

Chris Horgan, Director at [Nanogreen Sustainable Facilities Management](#), explains how the company's unique approach to corporate social responsibility is driving positive change for both its customers and employees.

In the realm of commercial cleaning and soft facilities management, Nanogreen Sustainable Facilities Management (Nanogreen) has emerged not just as a service provider but as a force for positive change. At Nanogreen, our commitment to corporate social responsibility (CSR) extends beyond a mere checkbox exercise; it is an integral part of our ethos and a catalyst for societal transformation.

Sustainable solutions for a changing world

In our pursuit of excellence, we strive to deliver the highest quality commercial cleaning and soft facilities management services. Nanogreen stands at the forefront of innovation, employing current techniques and eco-friendly cleaning products to provide environmentally sustainable solutions for all hygiene needs. Our services cater to a diverse range of clients, including Local Authorities, Education settings, and private sector organisations, addressing the challenge of declining budgets and the increasing demand for comfortable working environments.

Protecting the public

Back in 2020, the unprecedented challenges posed by the Coronavirus pandemic demanded a rapid and effective response. During that period and ever since, we have been working closely with schools, care homes, and sheltered accommodation providers to ensure the safety of key workers, guests, pupils, and stakeholders. Our dedication to safeguarding public health during these trying times underscores our

commitment to the well-being of the communities we serve.

A comprehensive service portfolio

Nanogreen offers a comprehensive range of services, including washroom hygiene, commercial cleaning, and pest control. Our managed washroom services, flexible contracts, and fixed monthly pricing ensure a clean, hygienic, and hospitable environment. We provide reliable and high-quality business and office cleaning services, offering tailored solutions for one-off cleans or dedicated contract cleaning. Additionally, our pest control services contribute to maintaining a healthy and hygienic workplace.

Adopting a socially responsible approach

At Nanogreen, we go beyond traditional business models. We are not just about delivering services; our focus is on making a positive impact on society and the local economy. Through our CSR approach, we have achieved significant milestones, such as employing individuals who were previously rough sleeping, investing in local authorities, and assisting the NHS and social care services in saving substantial amounts.

Our commitment to creating a fairer, cleaner society is reflected in our efforts to recruit, train, and develop individuals who may have faced barriers to employment. As the first facilities management company in the Wiltshire area to recruit those deemed unemployable, we continue to give work experience to underprivileged teenagers and collaborate with charitable organisations to bring about positive change.

We are focused on the delivery of our goal to increase our social impact and contribute back to [society and the local economy](#).

Here are some examples of what we have achieved at Nanogreen through our unique approach so far:

- We've employed two people who were previously rough sleepers
- We've invested £42,802 back into local authorities
- We've helped the NHS & GP services save more than £154,000 through the relief of anxiety, depression or addiction due to job security
- We've placed two former rough sleepers into full-time employment with an economic impact of £139,257
- The net result of using Nanogreen Cleaning is £108,457

B Corp-Certified for social responsibility

Adopting a socially responsible approach, Nanogreen proudly holds the B Corp certification, signifying our dedication to meeting rigorous standards of social and environmental performance, accountability, and transparency. We believe in using business as a force for good, aligning our values with the global movement of B Corps. Learn more about B Corp certification [here](#).

Nanogreen's CSR Impact Report

Recognising the need for transparency and accountability, in 2020 we produced our CSR Impact Report, outlining tangible changes and results achieved during a challenging year for both business and society as a whole. For Nanogreen, sustainability is not just a buzzword; it is a key element in building a healthier and more fruitful world and economy.

As an FM provider with a different approach, we can help you with your organisation's corporate social responsibility.

Not only can we help other organisations take the leap to provide employment to some of our most vulnerable citizens, but we can also help your organisation fulfil its corporate social responsibility (CSR), simply by working with us.

By partnering with Nanogreen as your preferred cleaning contractor we will continue to recruit with our local authority and charity partners including the Richmond Fellowship, as well as continue to train, develop and provide further opportunities for those who otherwise may not been given a chance.

Whether your priorities lie in environmental conservation or social responsibility, I believe Nanogreen can strengthen your values and objectives. Our commitment to CSR goes beyond rhetoric – it's a driving force for empowerment, inclusivity, and positive change.

Achieving recognition

Nanogreen is proud to announce that we've been recognised for our commitment to service excellence. We've recently been shortlisted for the Southwest Business Awards in the SME of the Year and Employer of the Year categories; this is a testament to our growing reputation for delivering exceptional facilities management solutions. It's a reflection of the dedication and hard work of our team, and we're honoured to be acknowledged among the best in the Southwest business community.
