

PTSG completes service at Essex church

2 years ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has completed a project to deliver specialist electrical services at St Mary's Church in Prittlewell, Southend-on-Sea.

St Mary's Church is a Grade I listed parish church in the suburb of Prittlewell. It is the largest and one of the oldest churches in Essex. It was founded in the 7th century as a chapel by the Saxons. From the 12th century until the 17th century it was added to, and became the largest church in the county of Essex, as well as one of the oldest churches in the county. The church is also the largest in both Southend and South East Essex.

In this project, an engineer from [PTSG Electrical Services Ltd](#) attended the site to carry out a test of the church's lightning protection system. The result was a "pass" and PTSG's engineer was commended for his excellent service.

Following a test such as this, a certificate is issued which states that a further test should be performed in 11 months' time. This will determine whether the system remains in first-class operational order or if it requires any remedial work. PTSG's engineers are highly qualified to carry out remedial work if necessary.
