

PTSG delivers for major waste management company

1 year ago

Premier Technical Services Group Ltd (PTSG) has been contracted to deliver specialist building services to one of the UK's leading waste management providers.

The customer, headquartered in High Wycombe, provides collection, landfill, recycling and special waste services to local authorities and industrial and commercial clients throughout the UK.

It was founded in 1912 and was originally engaged in the removal and sale of ashes and clinker from power stations in London. In June 2022, the company was valued at £1.36billion.

Today, its ambition is to change the way people think about waste. If people think differently about waste, they will act differently. More will be redistributed, re-used, recycled, or recovered – helping to reduce emissions, protect the environment, and save the planet.

In this contract, operatives from PTSG Building Access Specialists Ltd will deliver roof maintenance services to protect the structural integrity of the customer's premises. PTSG's teams are experienced in delivering maintenance and repairs to tiled roofs, whether flat or sloping, and can carry out a wide variety of general works. They also use drones to carry out detailed surveys, giving customers a highly accurate picture of the condition of their buildings and the work required.
