

A Glowing Transformation: OCS Ireland's Cleaning Services at a Major Airport

1 year ago

OCS Ireland, recently undertook a commercial cleaning project at a major international airport located in the south of the country. This airport is a vital transportation hub for millions of passengers annually and invests in its terminal buildings and facilities to ensure a welcoming environment.

OCS Ireland contributes to their mission every day. Our services range from assisting Passengers with Reduced Mobility (PRM) to ensuring that our cleaning teams make passengers feel safe and welcomed in the airports, lounges, and terminals we serve.

Our customer places passenger experience at the pinnacle of its priorities, which means a comprehensive cleaning service is essential to maintain high standards of cleanliness. Over the course of four nights, the project was completed without any impact on the airport's operation. The airport floors were fully restored to their former glory, now shining and creating a clean, modern look throughout the duty-free area.

The project's successful delivery has resulted in high levels of customer satisfaction, with airport management expressing further confidence in our abilities. This project has only continued to strengthen our partnership and our shared commitment to enhancing the overall travel experience for all passengers.
