

NG Bailey IT Services joins RingCentral Reach Partner Program

2 years ago

The IT Services business of [NG Bailey](#), UK independent engineering and services business, has announced it has joined the RingCentral Reach™ partner program, which provides channel partners with tools and resources to help them achieve success.

This program will help NG Bailey extend its cloud-based contact centre and unified communications services to business customers across the UK.

Kelly Tedesco, Managing Director at NG Bailey IT Services, said: “Together with the RingCentral team, we’re excited to be further enhancing our unrivaled technical expertise in both existing and emerging technologies as we look to use our consultative approach to deliver solutions that transform what’s possible in connectivity for our clients.”

Being a RingCentral Reach partner will not only offer NG Bailey’s customers access to RingCentral’s leading cloud UCaaS and cloud CCaaS solutions, but also will support the development of their IT Services team’s technical expertise. This will include specialist training for its current and future cohorts of apprentices on the latest emerging technological solutions.

“Partners such as NG Bailey are instrumental in enabling us to deliver leading AI-driven cloud communications solutions to customers as they look to supercharge productivity and elevate employee and customer experiences,” said Zane Long, Senior Vice President, Global Partner Sales at RingCentral. “We look forward to working with NG Bailey as we strengthen and accelerate our channel presence throughout the UK.”

RingCentral Reach provides channel partners with the tools and resources to help companies of all sizes

achieve greater business success with RingCentral's leading cloud communications, contact centre, video meetings and hybrid events solutions. Partners are valued for their deep expertise and guidance in helping customers switch to cloud-based communications, and for their ability to tackle large-scale, complex enterprise needs.
