

PTSG observes Earth Day 2024

1 year ago

[Premier Technical Services Group Ltd \(PTSG\)](#) will observe Earth Day on 22 April 2024.

Earthday.org's founders created and organized the very first Earth Day on April 22, 1970. Since then, earthday.org has been mobilizing over 1 billion people annually on Earth Day, and every other day, to protect the planet.

Earth Day is a reminder of the importance of environmental conservation and sustainability, encouraging us to come together and take action for a healthier planet and brighter future.

Premier Technical Services Group Ltd (PTSG) has been committed to the practices and principles of ESG (Environment, Social and Governance) before it became part of the everyday language of the business world. Corporate social responsibility (CSR) has been rooted in PTSG's business model from day one and in the ordinary course of business, its engineers operate in ways that enhance society and the environment – not because of government edicts but because it is the right thing to do.

In more recent years, as ESG has become a mandatory part of every business's strategy, PTSG has ensured that each area of its business is not only familiar with the regulatory and reporting requirements and obligations of its staff, but makes them a priority in its business strategy going forward. The aim is to achieve net zero as a Group long before the government mandate of 2050.
