

Azolla Software is proud to Partner with MCP's Smart Asset Maintenance to Transform Facilities Management with IoT Solutions

June 11, 2024

Azolla Software, a leading provider of FM software solutions harnessing the power of the Internet of Things (IoT), is proud to announce its strategic partnership with **Smart Asset Maintenance**, a member of the **MCP Consulting Group**. This collaboration signifies a significant step towards revolutionising facilities management by integrating cutting-edge technology solutions with unparalleled industry expertise.

With over 30 years of experience in maintenance and asset management, Smart Asset Maintenance has established itself as a trusted leader in providing support and guidance to businesses seeking improvements in energy consumption and maintenance strategies. Through its commitment to reducing costs and improving efficiency, Smart Asset Maintenance has become synonymous with excellence in the field of facilities management.

"We are delighted to partner with Smart Asset Maintenance," said Fergus MacMahon, CEO of Azolla Software. "Their expertise in system development and process facilitation, combined with our innovative technology solutions, will enable us to deliver even greater value to our clients."

Smart Asset Maintenance brings together people, buildings, and technology to create comprehensive improvement plans. As energy efficiency consultants, they assess current energy usage and ratings, developing strategies to enhance efficiency. By leveraging IoT technology, Smart Asset Maintenance can enhance operational efficiency, reduce downtime, and maximise asset performance for its clients.

"Our approach to maintenance issues is based on understanding our clients' requirements and how their

day-to-day activities are managed,” explained Peter Gagg, CEO of MCP. “Through our partnership with Azolla Software, we can provide independent advice and guidance on selecting and implementing the right technology solutions to drive business success.”

The partnership between Azolla Software and MCP’s Smart Asset Maintenance will follow a structured methodology to ensure clients receive tailored solutions that address their unique needs. This methodology includes seven steps to success, from understanding client requirements to selecting appropriate solutions and suppliers, all aimed at delivering maximum value and reliability.

“Together, Azolla Software and Smart Asset Maintenance are poised to transform the facilities management landscape,” added MacMahon. “By offering innovative solutions that empower businesses to thrive in today’s dynamic environment, we are setting a new standard for excellence in facilities management.”

This partnership signifies a significant expansion for Azolla Software in the UK market, leveraging the extensive industry expertise and established reputation of MCP’s Smart Asset Maintenance. Together, we aim to set new standards of excellence in facilities management, offering innovative solutions that empower businesses to thrive in the ever-evolving landscape of facility operations.
