

Meet PTSG this week at Housing 2024

1 year ago

Premier Technical Services Group Ltd (PTSG) will be at stand P25 at Housing 2024 (co-located with PFH Live), which takes place from 25-27 June in the Manchester Central Convention Complex.

In an election year, following years of the most challenging circumstances for housing associations, registered providers and their tenants and residents, there has never been a more important time for the housing and wider living sector to come together.

Housing 2024 allows attendees to meet with the entire housing supply chain under one roof. PTSG has been an important part of that supply chain for a number of years. As the UK's leading provider of specialist services, the Group works with a number of housing associations and local authorities. Its experts deliver services from PTSG five business divisions, including fixed wire testing, legionella risk assessments, remote temperature monitoring and a wealth of passive fire services including fire door installation, testing and inspection and remedials and fire compartmentation. This ensures buildings are compliant, safe and protected throughout for residents.

Housing 2024 is the ideal space to share ideas, learn, collaborate and network. Visitors to stand P25 can book a free consultation with PTSG to gain an insight into how its engineers can deliver safety and compliance in all the required areas.
