

PTSG to shore up residences in Peckham

June 17, 2024

Premier Technical Services Group Ltd (PTSG) has been contracted to deliver specialist electrical services at a residential development in South London.

The Ledbury Estate is a large estate of social housing, in Peckham in the London Borough of Southwark. The estate is just south of the Old Kent Road, part of the A2 4 kilometres from both Tower Bridge and the Elephant & Castle it is adjacent to land used by George Livesey for the South London Gasworks.

The estate comprises four 13-storey H-shaped tower blocks. They were constructed between 1968 and 1970 for Greater London Council using the Larsen-Nilsen method.

In this contract, engineers from **PTSG Electrical Services Ltd** will install a brand-new lightning protection system which will protect the residences and all users in the event of an electrical storm.

PTSG is the UK's leading provider of lightning protection services. It is also thought to be one of the oldest. JW Gray, which became part of PTSG in 2015, began trading in 1835, making it one of the oldest – if not *the* oldest – trading provider of lightning protection services in the UK and possible even Europe.
