

Tilbury Douglas celebrates project handover at Kingsway Park High School with naming ceremony for Lemn Sissay Building

1 year ago

Tilbury Douglas, a leading UK building, infrastructure, engineering and fit-out business, has successfully completed the phase one construction of the new Kingsway Park High School, a Net Zero Carbon in Operation (NZCiO) secondary school in Rochdale, Greater Manchester.

This week, the team celebrated the handover of the new building with a naming ceremony, marking the successful partnership between Tilbury Douglas, Altus Education Partnership, and the Department for Education (DfE).

The new three-storey building, named after former Manchester University chancellor Lemn Sissay, was constructed using cloud-based collaborative technology and lean construction methods, including an offsite-manufactured 'Kit of Parts.'

The school's NZCiO design embeds efficient, all electric, low energy building fabric, using photovoltaic panels that balance electricity use with low embodied carbon materials and biodiversity. Facilities include practical teaching classrooms for design technology and reprographics, food technology, science laboratories and staff rooms.

1,400 pupils moved into the new building as Tilbury Douglas continue with phase two, carefully demolished the existing Laingspan building to minimise educational disruption during the exam period.

Additionally, hard-paved and grassy social areas will be sheltered with newly installed canopies featuring photovoltaic panels.

The project has achieved an impressive social value return on investment of over £7m, which includes more than £1,000 of donations in kind for the Trussell Trust Food Bank, 98% local spend, 626 weeks of apprentice training, and an innovative partnership with DKMS charity on site to recruit blood stem cell donors in the fight against blood cancers.

Martin Horne, Regional Director for the North West at Tilbury Douglas, commented: “The ceremony marks a significant milestone as this building stands as a testament to the hard work, dedication, and collaboration of everyone involved. We are proud to deliver a safe, modern, and inspiring environment where future generations will learn and grow.”

Phil Shaw, Managing Director – Building North at Tilbury Douglas, added: “The Tilbury Douglas team effectively guided the DfE through a collaborative and well-informed engagement process, presenting clear and actionable options to achieve Net Zero in school operations. This successful experience will be invaluable as we partner with the DfE to deliver eight more low-carbon schools in the North West, ensuring a sustainable future for education.”
