

49 promotions as Workman readies for growth

1 year ago

[Workman](#) has made 49 promotions across the business, including six new partners, pictured here.

[Charting an upward trajectory](#), as reported by [Green Street News](#) (formerly *React News*), the firm currently manages more than 4,000 properties, with a capital value of approximately £20 billion and rising.

The latest promotions extend across the firm's 11-strong nationwide office network and cover vital sectors. These include core property management and building consultancy, along with high-growth services, such as building technology, ESG, and project management. The geographic spread and multi-disciplinary nature of the promotions highlights continued growth across all parts of the business.

Pictured above, the new partners are (L-R): Zakir Mangera (property management, Manchester); Eleanor Newton (property management, London); James Ballantyne (property management, London); Adeline Goodheart (building consultancy, London); Andrew Burton (building consultancy, Newcastle); James Simpson (property management, London).

Matthew Pateman, Managing Partner, said: "Investment in our people continues to be a cornerstone of the Workman culture, and these promotions are shining examples of the career development and progression on offer here. Talent is the driver of positive change, so the energy, determination, and dedication of our teams deserves to be recognised and rewarded. Our recent promotions are testament to these individuals' commitment to delivering the highest standards of service to our valued clients. I congratulate every one of this year's group and look forward to working alongside them, as they continue to develop in their careers."

With more than 800 employees, Workman is dedicated to creating growth opportunities for its team

members throughout the UK. These latest promotions come after the firm [recruited 46 graduates and apprentices](#) across the business during 2023, with more planned for 2024, to continue to develop the talent of the future.
