

Net Zero achievement for PTSG company

2 years ago

ESG (Environment, Social and Governance) has become an important priority for every responsible business. [Premier Technical Services Group Ltd \(PTSG\)](#) commits to the practices and principles of ESG. This has been the case even well before it became part of the everyday language of the business world.

The Group has been providing fire and life safety systems at Heathrow Airport since 2011. It is the largest account of Trinity Fire & Security – part of PTSG Fire Solutions acquired in 2019. Following the work of Trinity's net zero strategy team, its Heathrow office has achieved Net Zero Carbon for the second year running.

Trinity's Net Zero Carbon strategy will next focus on offices located in the Midlands and South West, as its teams systematically work through all of their locations. Its target is to achieve Net Zero across the company by 2030.
