

GRAHAM secures new contract with Northern Ireland Water

1 year ago

GRAHAM, a provider of facilities management and construction services, has been awarded a new contract by Northern Ireland Water. This contract will cover the North-West region and include a range of services, including building maintenance, minor civil engineering works, fencing and gate repairs, winter maintenance, compliance services, and installation and maintenance of various systems.

The new contract is a continuation of GRAHAM's long-standing relationship with Northern Ireland Water. It also builds upon the company's existing contracts with Yorkshire Water and Severn Trent Water, solidifying GRAHAM's position as a leading player in the utilities sector.

Works will include:

- Building inspection, repair, and maintenance services.
- Minor civil engineering works.
- Fencing and gate replacement and repairs.
- Winter maintenance.
- Compliance services.
- Installation and planned preventative maintenance of facilities electrical, mechanical, or electromechanical assets and systems.
- Installation and planned preventative maintenance, including inspection, repair and maintenance of fire alarm, access control, intruder alarm, intercom, and CCTV systems.

Gareth Smyth, GRAHAM Facilities Management Director, commented: “GRAHAM has a long and successful track record working with Northern Ireland Water and we look forward to continuing to build on this success with this new contract, and continue to grow our presence within the Water and Wastewater sector throughout the UK and Ireland.”

This new contract will further enhance GRAHAM’s presence in the UK and Ireland and demonstrate the company’s expertise in providing comprehensive facilities management solutions.
