

Mitie's 2024 ESG report reveals significant progress towards sustainability goals

2 years ago

Mitie has released its [2024 ESG report](#), revealing significant progress towards its sustainability goals. Mitie met or exceeded 13 of its ambitious targets for the past Financial Year (FY24), showing its commitment to each of its social value pillars - Environment, People, Communities and Responsible Supply Chain. Key highlights from the report included:

Environmental leadership

Working towards its 'Plan Zero' initiative to reach net zero Scope 1 and 2 emissions by 2025, Mitie has cut its Scope 1 and 2 emissions by 5%. The biggest contributors to this reduction were introducing low-carbon heat pumps across its sites and continuation of its transition to electric vehicles (EVs). Having welcomed its 5,000th EV this year, two thirds (66%) of Mitie's fleet is now pure electric, meaning it operates one of the biggest electric fleets in the UK. In recognition of these milestones and its ongoing environmental leadership, Mitie was awarded an 'A' grade for its carbon reduction strategy and reporting by the Carbon Disclosure Project (CDP), putting it among the top 2% of organisations assessed annually. Going beyond its own environmental impact, with its expertise across a range of green solutions, from solar power to biodiversity, Mitie has also continued to help its customers achieve their net zero targets. Highlights during FY24 include increasing London Euston station's recycling rates from 10% to 81% with a new on-site recycling facility and installing 2,000 solar panels at the Associated British Ports, Southampton site to reduce carbon emissions by 235 tonnes a year.

Empowering people with skills

Mitie has continued investing in training and development to create long-term, fulfilling careers for colleagues. It supported over 1,200 apprentices at any one time over FY24, offering 90 apprenticeship courses. This includes the new Professional Security Operative Level 2 apprenticeship, which Mitie played a leading role in developing to drive more career progression opportunities for the security industry, and a heat pump engineer apprenticeship, to help grow the UK's green workforce. Mitie also passed the £2 million milestone for Apprenticeship Levy gifting pledges in April this year. Through the Levy, Mitie has enabled over 25 small and medium enterprises (SMEs) and local community services across the UK to fund apprenticeship schemes.

Positively impacting communities

Mitie exceeded all of its goals under the Community pillar, upholding its pledge to make a difference in the communities it serves. This includes delivering almost 25,000 hours of volunteering to local causes as a result of its initiative to gift colleagues ten hours a year. Mitie's independent charity, The Mitie Foundation, which works to help support those from disadvantaged groups secure employment, also celebrated its tenth anniversary. Mitie recruited 418 individuals through the Mitie Foundation in the past year, as well as welcoming 790 forces leavers as part of its ongoing support for the Armed Forces community.

Fostering sustainability through the supply chain

Priding itself on being a responsible business, Mitie spent just under half (47.7%) of its supply chain spend with SMEs and £3.3 million with voluntary, community and social enterprises (VCSEs) - 46% above its target. Supply chain emissions also reduced by 12% compared to FY23, marking the end of a three-year supply chain transformation programme which focused on promoting sustainability through procurement.

Peter Dickinson, Chief Legal Officer, Mitie, said: "As one of Britain's biggest businesses we are committed to making a positive impact on our people, communities and the environment. With our 2025 net zero targets fast approaching, it's great to see that this year we exceeded so many of our goals." "We've been able to use what we've learnt from our own decarbonisation success to support our customers with their sustainability strategies, to broaden our impact and support Britain's net zero journey."
