

PTSG works with NHS subsidiary in north-east

11 months ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been awarded a place on a framework to deliver specialist passive fire services in the north-east of England.

This NHS subsidiary, while delivering services to its own Trust, also provides solutions nationally to external organisations that improve efficiency and safety and reduce costs. From revolutionary infection control products to a full suite of facilities services, it extends its NHS ethos and standards into the wider UK community.

The framework agreement provides NHS Trusts and other public sector organisations with experienced and competent fire door contractors for the supply and install of new and the repair and maintenance of existing. This includes [PTSG Fire Solutions Ltd](#), via component company Neo.

Passive fire protection is comprised of components or systems in a building or structure that slows or impedes the spread of the effects of fire or smoke without system activation. PTSG delivers a full range of passive fire services including fire compartmentation surveys and works, fire door surveys and works and fire stopping, executed as part of one-off condition assessments, following any alteration works or as part of annual inspection and rectification works required in high risk buildings.
