

STIEBEL ELTRON Introduces Free Heat Pump Courses Tailored for Gas Installers

2 years ago

In response to the growing demand for renewable energy solutions, [STIEBEL ELTRON UK](#) has announced the launch of a specially tailored Heat Pump Workshop designed exclusively for gas installers.

The first in-person course will be held on 16th and 17th August 2024 at STIEBEL ELTRON's head office in Bromborough, with webinar versions available for those who are unable to travel.

As the global energy landscape shifts towards sustainable alternatives, gas installers are increasingly seeking efficient ways to expand their skill sets and transition into the renewables sector.

STIEBEL ELTRON's streamlined course offers a comprehensive pathway for professionals to make this transition smoother and quicker.

The program includes myth-busting segments that debunk common misconceptions about heat pumps, ensuring installers are well-equipped with factual, up-to-date knowledge.

Designed to address the unique needs of gas installers, offering practical insights and hands-on training that will enable them to confidently install and maintain heat pump systems, participants will benefit from STIEBEL ELTRON's heat pump expertise and resources, gaining the skills needed to thrive in the renewable energy market.

During the workshop, trainees will look at the difference between a gas boiler and a heat pump system, closely following hydraulic and electrical diagrams, and installation methods, as well as correctly sizing a heat pump for the property and why this is important.

The course will also provide trainee installers with knowledge to service and repair heat pumps, including how to commission a heat pump.

Additionally, it will also provide an overview on the difference between air source and ground source heat pumps and how pre-plumbed cylinders can decrease installation time.

Founded in 1924, STIEBEL ELTRON is a market leading supplier of technology for building services and green technology, with a particular focus on central heating products.

Installers can secure their place on the course by visiting: www.stiebel-eltron.co.uk/gasinstaller
