

PTSG gains place at Oxford Brookes University

10 months ago

[Premier Technical Services Group Ltd \(PTSG\)](#), via component company Trinity Fire and Security (Trinity), has been providing specialist fire solutions at the Oxford Brookes University.

Oxford Brookes University is a public university in Oxford, England. It is a new university, having received university status through the Further and Higher Education Act 1992. The university was named after its first principal, John Henry Brookes, who played a major role in the development of the institution.

Oxford Brookes University is spread across four campuses, with three primary sites based in and around Oxford and the fourth campus located in Swindon. It is divided into four faculties: Oxford Brookes Business School, Health and Life Sciences, Humanities and Social Sciences, and Technology, Design and Environment. The university's partnership with the Association of Chartered Certified Accountants (ACCA) allows ACCA students to earn a BSc (Hons) in applied accounting with the submission of a research and analysis project work while taking their ACCA examinations. The university also has schools of architecture and law. Brookes is a member of the University Alliance mission.

In this contract, engineers from Trinity are installing [fire detection and life safety systems](#) at the university. As experts in this field, the systems and equipment delivered will ensure the university is not only compliant with legislation, but that there is complete safety within its buildings.

Site work can be challenging, especially sites of this size, as it's a complex engineering environment with multiple disciplines working in the same area. One of Trinity's strengths is in collaboration, and all its teams communicate and work well with supply chain partners, including CMB Engineering and Core 7, to make progress and ensure success.
