

PTSG receives glowing praise for lightning protection project

September 17, 2024

Premier Technical Services Group Ltd (PTSG) has recently completed a lightning protection for NHS Property Services, drawing strong praise from the client.

A team from **PTSG Electrical Services Ltd** carried out a test and inspection of the client's lightning protection system, enabling some high-risk remedial work and, ultimately, a positive outcome. The client commented: "PTSG's engineers (Yana James and Keiran Wain) have both been very responsive and really helpful... Please pass on my gratitude and I would hope that both could be given some recognition in view of their sterling efforts, going the extra mile. Nothing was too much trouble and I truly felt that the levels of engagement were excellent."

Once a lightning protection system is installed, it must be professionally tested at least once a year to ensure it is capable of conducting a potential lightning strike to a safe earthing point. This ensures compliance with the Electricity at Work Act 1989 and BS EN 62305.

PTSG is the UK's leading provider of lightning protection services and member of the Association of Technical Lightning & Access Specialists (ATLAS).
