

PTSG's skills on display at London gallery

12 months ago

[Premier Technical Services Group Ltd \(PTSG\)](#) has been contracted to deliver specialist Access & Safety services at Tate Modern in London.

Tate Modern houses the UK's national collection of international modern and contemporary art. It forms part of the Tate group, together with the Tate Britain, Tate Liverpool and Tate St Ives.

Tate Modern is one of the largest museums of modern and contemporary art in the world. As with the UK's other national galleries and museums, there is no admission charge for access to the collection displays, which take up the majority of the gallery space, whereas tickets must be purchased for the major temporary exhibitions. The gallery recovered strongly after being closed for much of the COVID pandemic in 2020; it is now the third most visited museum in Britain and the fourth most visited art museum in the world.

In this contract, engineers from [PTSG Access & Safety Ltd](#) will undertake the replacement of mansafe systems. Mansafe systems comprising stainless steel wire rope, posts and fixings provide users with an approved, tested and inspected method of safe access/work. These systems can be horizontal, vertical and overhead. They are part of a comprehensive portfolio of fall protection systems that PTSG installs, tests and inspects and maintains to keep clients compliant with regulations.
